The election of species requirement was made Final in Paper No. 6.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as obvious over WO 99/05108.

WO 99/05108 teaches, page 55, example (g), a compound of the formula: (N,N,N',N'-Tetramethyl-N,N-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-2-hydroxypropyl]-hexamethylenediammonium dibromide. See Example 1 and Abstract, for using 0.5 to 0.1% of the elected species for preventing loss of brightness and for enhancing resistance to yellowing of a lignin containing pulp, e.g. chemimechanical and thermomechanical. See Abstract for adding UV absorbers and polymeric inhibitors and metal chelating agents as co-additives. The claimed N,N,N',N'-Tetramethyl-N,N-bis-[2-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-ethyl]-hexamethylenediammonium Dibromide would have been an obvious variant of N,N,N',N'-Tetramethyl-N,N-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-2-hydroxypropyl]-hexamethylenediammonium Dibromide of Example (g) on page 55 of WO 99/05108 as WO 99/05108 teaches the alternativeness of using alkyl chains containing 1 to 4 carbon atoms interrupted with two oxygen's and further not interrupted or interrupted with two hydroxyl groups. See WO 99/05108, page 39, for alternative R1's. Also see, page 8, lines 6-20. Applicant should compare the claimed N,N,N',N'-Tetramethyl-N,N-bis-[2-(1-oxyl-2,2,6,6-

tetramethylpiperidin-4-yloxy)-ethyl]-hexamethylenediammonium Dibromide to the (N,N,N',N'-
Tetramethyl-N,N-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-2-hydroxypropyl]-
hexamethylenediammonium dibromide of WO 99/05108.

Applicant argues that the difference between the compound of Example 18 of the instant Application, and the compound on page 55 of WO 99/05108 is that the compound of WO 99/05108 alkylene groups with secondary hydroxyl groups are not analogous to the present straight chain alkylene groups (e. g. ethylene). However, the alternativeness of using alkylene chains containing 1 to 4 carbon atoms interrupted with two oxygen's and not interrupted or interrupted with hydroxyl groups is taught by WO 99/05108, on page 39 and page 8, lines 6-20. Thus, it would have been obvious to the artisan to substitute an alkylene chain interrupted with only two oxygen's for one interrupted by both two oxygen's and two hydroxy groups.
